Experience

Sep 2025 - Present, Málaga, Spain

■ Project Manager / PMO

Embrace-it Spain

Started as Project Manager in September 2025 and moved into the PMO role in November 2025, supporting governance and delivery control for a multi-silo software program.

- Support program governance by consolidating priorities, risks, actions and delivery signals into clear management visibility.
- Build and maintain PMO control views for management, translating meeting outcomes into status, owners, risks, blockers, actions and conditions to green.
- Drive cross-functional alignment through daily and weekly follow-up, PM meetings, management reporting, minutes, risk tracking and escalation support.
- Bridge technical teams, PMs, senior management and business stakeholders, keeping delivery priorities aligned with release milestones.
- Improve visibility over dependencies, readiness gaps and delivery risks, separating local progress from integrated readiness.

Key achievements

- Built a PMO governance and reporting model to provide executive visibility over delivery progress, risks, blockers and release readiness.
- Strengthened governance by making ownership, blockers and release conditions explicit.
- Improved delivery control by translating complex multi-team execution status into clear management dashboards and decision-oriented follow-up.

Jan 2019 - Aug 2025, Málaga, Spain

■ Technical Development Team Lead / Project Manager

Moneytrans

Led fintech software delivery in a regulated environment, combining technical leadership, project coordination and business-facing responsibilities.

- Led development of a banking/payment-account product from scratch using .NET/C#, third-party financial integrations and compliance-related systems.
- Managed and mentored a development team, defining priorities, reviewing solutions, approving releases and coordinating with business, product and compliance teams.
- Provided project oversight, feasibility analysis, technical planning and reporting to align delivery with business goals, security and regulatory requirements.
- Contributed to the launch and scaling of a complex fintech product while improving collaboration between technical and non-technical departments.

Jan 2016 - Dec 2018, Málaga, Spain

■ .NET Software Developer

SolBooking

Full-stack developer for a hotel reservation platform, working on application architecture, databases, API integrations, technical documentation and front-end/back-end development using C#, ASP.NET, Razor, JavaScript and SQL.

Jun 2012 - Jul 2014

■ Sales and Marketing Department Manager

Europcar

Customer service, retail sales, incident resolution and revenue growth support at Málaga Airport and María Zambrano Station.
